

Leveraging Your Ecometry Investment

If you have already invested in an award-winning Ecometry software solution, you know the value of maintaining good relationships with your customers. By adding QuickAddress for Ecometry, you will ensure that addresses contained within your Ecometry solution are accurate and valid. This will help you benefit even further from your initial investment in your customer relationships.

What's wrong with this address?

Enters Addresses Automatically

After just a few keystrokes, QuickAddress for Ecometry provides drop-down lists of valid, correctly formatted potential addresses. The user simply highlights and selects the right choice. This saves time and helps avoid spelling errors, automatically.

“Now, when a customer says he lives at 123 Main, QuickAddress automatically adds the street description, such as ‘Avenue,’ ensuring that we don’t enter an incomplete address. It’s been a huge benefit, has reduced our address correction fees, and I think will continue to further reduce our costs.”

*– Tim Manns, Manager of Operations and Development,
Overton’s Water Sports*

Validate in Real Time

QuickAddress for Ecometry is a real-time, automatic address validation solution, helping ensure that addresses collected during phone or point-of-sale purchasing are accurate, correctly formatted, and valid. Accurate, standardized customer addresses can help you save money by avoiding everything from:

- FedEx and UPS surcharges for incorrectly formatted addresses;
- Returned packages;
- Wasted time in the call center;
- Time spent researching valid addresses using online sources or phone books.

“The rapid addressing technology and productivity improvements that QAS provides will enable our clients to handle larger volumes of customers more efficiently – and that’s something Ecometry endorses wholeheartedly!”

– John Marrah, President, Ecometry Corporation

Improve Data Quality and Shorten Call Times

QuickAddress for Ecometry validates addresses against official U.S. Postal Service® records. QuickAddress’ easy-to-use interface enables call center operators to improve data quality, while simultaneously reducing the time it takes to capture an address.

eCommerce

QAS recognizes that all data, regardless of source, should be validated in real time, before it enters the company database. Our eCommerce validation engine, QuickAddress Pro Web, helps you address the multichannel nature of your business by validating addresses customers provide over the Web.

Technical Requirements

QuickAddress for Ecometry is integrated into versions 5.32 and later of Ecometry. It works with the Reflections, Minisoft, VisualLink and Full View Functionality. We support both MPE and Open Systems on the back end.

QAS is a non-exclusive licensee of the United States Postal Service®
