

# Experian QAS Professional Services

Custom Consulting, Training and  
Development Services

**“We have some of the world’s leading experts on handling of U.S. and international addresses. Our team really enjoys working with customers to make sure they get up to speed and start reaping the benefits of Experian QAS quickly and painlessly.”**

— Chris Williams  
Vice President of Client and  
Technical Services

Combining extensive address management expertise and many years working with Experian QAS products, we offer consulting, training and development services so that you can make the most of your address management investment in the least amount of time.

Experian QAS can work with you to:

- Integrate or assist you in integrating any of our API products into your application(s) whether it be a public web site, internal or a standalone requirement.
  - Create an address management strategy and associated plan of action geared toward ongoing improvement of your data against pre-determined targets
  - Assist with the implementation and project management of your plan, including the installation and configuration of your Experian QAS solution
  - Evaluate and then test your integration to prevent any potential complications
  - Provide standard or custom training on any element of our product range to ensure you derive maximum benefit from your investment

### **Integration Development**

If you lack the resource or expertise to complete in-house integration coding, we can perform the work for you. We take responsibility for project management, business analysis, integration specifications, and coding, just acceptance testing is needed. All coding is fully commented and reviewed with you at completion.

### **Why Experian QAS Professional Services?**

We offer expertise gained from working with hundreds of client applications and websites.

We provide a specialized service dedicated to the products we have developed, and can tailor services to meet your specific requirements.

We offer a range of skills and depth of knowledge that will help maximize your project's ROI and give you the confidence that any work commissioned will be completed to a set schedule, without any hidden costs.

### **Integration Consulting**

We work with your technical staff to implement our solutions as quickly as possible. We then test that every element has been integrated correctly, and that all address formats and end-user scenarios have been considered. We train your staff on how to support and maintain the integration in the event of future changes with your underlying application or infrastructure. We will assist with the installation and configuration of our certified, pre-packaged integrations into third-party solutions reducing the implementation time and speeding the go live process.

### **Bureau, Data Analysis and Pre-processing**

We have worked with hundreds of clients to make sense of their address data and prepare it for automated cleansing. Having expertise in both North America and international address formats in addition to understanding how batch matching algorithms work, we ensure that our software cleanses the highest possible percentage of your data.

### **Address Management Consulting**

Larger organizations can save hundreds of thousands of dollars and improve customer satisfaction by integrating appropriate address management technologies and workflows into their business practices. "We have exceptional knowledge of address management strategies. We can help your organization employ technologies and practices that will make your address hygiene the best it can be.

### **Training Services**

Make sure your Experian QAS software is used to its full potential. We provide packaged or custom training sessions for trainers or end-users on all Experian QAS products.
